

AI engineer building **production LLM-agent systems**. Shipped an async Document AI pipeline serving **10,000 users** and an autonomous prompt-optimization agent (GEPA) that opens PRs against a live production agent. Full-stack foundation (MERN / Next.js) and **IEEE-published** security research.

EXPERIENCE

AI Engineer (SDE 1), **Nbyula** — Bangalore

Jan 2026 – Present

- Built an autonomous **Prompt Improvement Agent** (GEPA over production traces) that evaluates the main Nbyula agent and opens **autonomous PRs** to improve it.
- Shipped a full **async Document AI pipeline serving 10,000 users** — classification, extraction, QA, and automated lead-nudging on poor-quality uploads.

AI / Full-Stack Engineer (SDE Intern), **Nbyula** — Bangalore

Dec 2024 – Jan 2026

- Built a **LangGraph + whatsapp-web.js agent** that re-engages disengaged leads with messages personalized from CRM data.
- Shipped an **OpenAI agent** (Instagram @gmat_nbyula via ManyChat) that converted inbound Instagram leads to enrollments.
- Built a **content-moderation system** (fine-tuned BERT + LLM-as-judge) that cut spam — including drugs / NSFW — by **99%**.
- Built an **automated foreign-application filing agent** for MS applications (Browser Use + Claude Agent SDK + LangGraph).
- Reduced clicks on SOP / Essay flows with direct Razorpay checkout → **₹80K product-led sales**.
- Added lead filtering / sorting and call + Google Meet auditing to the CRM; introduced an Operations role for coach tracking.

Full-Stack Engineer (SDE Intern), **CreditMitra** — Hyderabad

Apr 2024 – Sep 2024

- Built and shipped **creditmitra.in** (responsive; AWS S3 / Route 53 / CloudFront) with role-based access policies.
- Implemented a MERN backend with SEO, chatbot, email, and a **Jenkins / Ansible CI/CD** pipeline on EC2.
- Instrumented server-side conversion tracking (MS Clarity, GTM, Mautic, Meta Pixel, UTM) for ad targeting.
- Built an **HRMS web app + PWA** — attendance, payroll, offer letters, employee directory.

RESEARCH & PUBLICATIONS

- KS-PRET-5M** — a 5M-word / 12M-token Kashmiri pretraining corpus.
- Novel Attack Vectors to Abuse AWS for Cryptojacking* — **IEEE · ICAAIC'24**
- Navigating the Cloud: Emerging Trends in Security* — **IEEE · ICSSAS'24**
- Mitigating software-package hallucinations in open-source LLMs.
- ORCID 0009-0002-2805-4687 · IEEE TDSC contributor

AI / ML SKILLS

LLM agents: LangGraph, LangChain, Claude Agent SDK, OpenAI Agents, Browser Use, GEPA prompt optimization, RAG, LLM-as-judge, fine-tuning (BERT)

Eval / tracing: Langfuse

Orchestration: N8N, Make, Vapi · **Serving:** Ollama

Models: Claude, GPT-4o, Gemini, Llama

ENGINEERING

Python: FastAPI, Django / DRF, PyTorch, Pandas, Celery, Boto3

JS / TS: React, Next.js, Node, Express, Nest.js, Three.js

Also: Java / Spring Boot, Solidity

Cloud: AWS (EC2, ECS, Lambda, S3, CloudFront, DynamoDB, CodePipeline), Docker, Nginx / Apache

Data: MongoDB, PostgreSQL, Redis

Test: Playwright, Puppeteer, Selenium, Pytest

Security: Nmap, Wireshark, Ghidra, Volatility

SELECTED PROJECTS

- blogllm.com** — AI blog auto-curating LLM research into a daily email digest.
- AuditX** — compliance / audit platform executing CIS-benchmark scripts.
- ruluka.com** — full-stack e-commerce (MERN, Redis, AWS).
- Saloonz** — React Native app with real-time haircut simulation (MediaPipe).

EDUCATION

KL University — **B.Tech CSE (Honors)**
Cybersecurity & Blockchain · 2021–2025 · CGPA **9.1 / 10**

CERTIFICATIONS

- AWS Cloud Practitioner
- Ethical Hacking — IIT Kharagpur (NPTEL)
- RedHat Certified Enterprise App Dev (Java)

LEADERSHIP

- Founder, KL University Stand-Up Comedy Club — team of 20, 1,000+ attendees.
- Student mentor — co-led 80 students.
